

Emulsion[®] PRO+

ADVANCED OIL & WATER WOOD FLOOR FINISH

Emulsion[®] PRO+
is a one-component,
ambering, commercial
grade, self-leveling
sealer & finish.

This product is an excellent choice for professionals that are looking to make the transition from OMUs (oil-modified urethanes) to waterbased finishes, or for professionals wanting an ambering finish that delivers a rich look of traditional oil but with all the advantages of a commercial waterbased finish.

Emulsion® PRO+

ADVANCED OIL & WATER WOOD FLOOR FINISH

Emulsion PRO+ is designed to apply, defoam, and self-level faster than any other oil & water sealer/finish on the market.

Professional Innovation

Emulsion® PRO+ is a one-component, ambering, commercial grade, self-leveling sealer & finish. This product contains an oxidative crosslinking polyurethane (OCP), and is ideal for use in Sport Wood Flooring application.

Emulsion PRO+ has many attributes of a traditional OMU - ambering, rich tones, ease-of-application, PLUS it has all the advantages of a waterbased sealer/finish – speed of application, fast dry times, low-odor, non-flammable, water cleanup, and multiple coats can be applied in one day.

Emulsion PRO+ is an excellent choice for professionals that are looking to make the transition from OMUs (oil-modified urethanes) to waterbased finishes.

Emulsion® PRO+ brings out the natural beauty of your wood floors.
