## OxyFECT™ - VERSATILE AND REVOLUTIONARY!

By Barry Rosenthal - Category Manager

When a new program is introduced that is so different from anything else, it can lead to countless opportunities. After reading this article you will have a better understanding of all the benefits and possibilities of Betco's revolutionary OxyFECT™ system.

**Betco's OxyFECT™ is the only peroxide disinfectant on the market that has a neutral pH.** OxyFECT™ H is the

industry's first Peroxide HOSPITAL Disinfectant. It is ideal in the healthcare environment as it has proven efficacy. In fact, Betco is the only manufacturer to develop a peroxide formulation that meets the AOAC Use Dilution test for hospital disinfectant criteria. In order to be a hospital disinfectant, you must kill pseudomonas, staph and salmonella. The dilution for hospital disinfection is 1:20 or 6.5 oz. per gallon. At this dilution ratio, OxyFECT™ H is also an EXCELLENT cleaner.

OxyFECT™ G is a limited disinfectant. It is a more economical option at a dilution ratio of 1:64 or 2 oz. per gallon. It is ideal for schools, general offices or facilities needing a value priced disinfectant. At a 1:64 dilution, OxyFECT™ G is a very good cleaner.

So why should I use a Peroxide disinfectant versus other active ingredients and more specific why Betco's

[About Betco](#)

## What's New

OxyFECT™? Peroxide is simply the most versatile active ingredient. It can be used to clean carpet, tile, grout, glass, walls and fixtures etc... without discoloring clothes, skin, or damaging surfaces. Other peroxide disinfectants with a low pH can damage sensitive surfaces like marble. With Betco's OxyFECT™, even in the concentrate form, the neutral pH is appropriate to use on practically any surface\*. With OxyFECT™ there is a true one product solution. No need for specialty cleaners. Use OxyFECT™ for all your cleaning and disinfecting needs.

The versatility of the OxyFECT™ system allows the product to be used in several different chemical management programs, from FASTDRAW to Peroxidraw to the FASTDRAW Peroxide system. With all these options, there can be some confusion.

- Advanced formula quickly emulsifies both animal fats and petroleum greases.

## Betco Member of U.S. Green Building Council

By Requill Buchanan - Communication Coordinator

Betco Corporation is one of the newest members of the U.S. Green Building Council. The U.S. Green Building Council is the nation's foremost coalition of leaders working to transform the way buildings and communities are designed, built and operated, enabling an environmentally and socially responsible healthy and prosperous environment that improves the quality of life.

Betco has been engineering green cleaning solutions since 1990. Our leadership role in the green movement enabled membership to this prominent council. Our Green Earth® Cleaning Program consists of several Green Seal certified products including our [Green Earth® Peroxide Cleaner](#), [Green Earth® Daily Floor Cleaner](#) and our new [Clario™ Green Earth® Foaming Skin Cleanser](#). Betco is honored to be a member of an organization that shares our same dedication to cleaning for a healthier environment.

- Perfect for use in mop buckets, automatic scrubbers or spray and wipe applications.

## Did You Know?

The recoat window on water based gym finishes has been **changed from 6 hours to 24 hours**. This is great news for gym contractors because they can now put down a second coat on day 2 and not have to abrade, vac, and tack before they coat. It should be noted that abrading in between coats does produce a smoother floor.
