

# BiCarbonX™ Premium Industrial Hand Cleaner

## DELIVERING PERFORMANCE

Patent-pending BiCarbonX™ Premium Industrial Hand Cleaner delivers performance for the toughest environments with a skin-conditioning experience the toughest workers deserve.

It doesn't stop there, it is also a highly sustainable, environmentally friendly and safe product as well. **BiCarbonX is a proprietary blend of natural emulsifiers, surfactants, and sodium bicarbonate, nature's most versatile exfoliant.**

The formula's ingredients are all bio-based, renewable, and have no negative downstream environmental effects. Whether an active surfactant or solvent, an exfoliant, a skin conditioner, a thickening agent or fragrance, it is a natural material or identified as a Safer Choice ingredient.

## SUSTAINABLE PRODUCTS

Additionally, BiCarbonX meets stringent Betco® Green Earth® requirements. With over 30 years of continuous evolution and improvement, the Green Earth program focuses on sustainable and safe products that perform as well as or better than their more caustic equivalents.

### Critical criteria for the program include:

- *Industry-best product performance—products must meet or exceed traditional products. This performance is verified by third-party lab testing or testing designed and performed in Betco laboratories.*
- *Must be environmentally friendly—products meet the strictest environmental standards, from low VOC emission to readily biodegradable products.*
- *Must be safer for the user—products are non-toxic, non-flammable and are formulated without suspected carcinogens, mutagens, or reproductive toxins.*

## DERMATOLOGIST RECOMMENDED

Also, with its dermatologist recommendation, BiCarbonX greatly contributes to skin health as well. Proven in lab tests, BiCarbonX increases skin moisture after hand washing while the leading competitors actually reduced skin moisture.

## CLOG-FREE GUARANTEE

Lastly, even with 40% more exfoliant than the leading competitors, BiCarbonX's ingredients are completely soluble in water and will not contribute to clogging drains—resulting in the industry's first Clog-Free Guarantee. Pumice and walnut shell exfoliant materials in less innovative formulas are insoluble and therefore can't make that claim.
