

Advanced Alcohol Sanitizers

Attention 500 mL User

To actuate the pump head, you will need to “break” the tamper seal

Set the bottle on a firm surface or counter and hold the bottle against the surface in a fixed position gripping the neck of the bottle/ pump using your left hand.

At the same time, apply downward pressure to the top of the pump and turn counterclockwise until you feel a light “click”.

Keep turning counterclockwise until the pump pops up and you are ready to dispense.
