

FLOOR CARE DISINFECTANT

STEP 1

FLOOR CARE DISINFECTANTS:

Pine Quat • pH7Q Dual • pH7Q

NOTE: Recommended for use on VCT, LVT, or other non-porous coated floor types.

STEP 2

Use the correct dilution ratio as per manufacturer's directions.

STEP 3

Apply the disinfectant solution to the floor with an automatic scrubber or mop and bucket. Do NOT pick up solution. WAIT the appropriate time as directed by the disinfectant label.

STEP 4

AFTER prescribed dwell time, pick up excess solution with automatic scrubber, vacuum or mop and dispose of used solution.

STEP 5

Clean out your automatic scrubber or mop bucket and let it air dry after disinfecting the floor.
