

# COVID-19

# Minimize Your Risk

A simple solution to help reduce the spread of disease.

Betco's Fight Bac™ RTU disinfectant convenient spray application is ideal for high touch points.\*

80% of germs are transmitted by hand-to-hand contact. Proper hand hygiene stops the spread of germs.

# COVID-19

## Betco® Can Help

The Centers for Disease Control (CDC) recommends disinfecting frequently touched areas such as: doorknobs, telephones, bathroom fixtures, etc. Wash your hands often with soap and water for at least 20 seconds. Use an alcohol-based hand sanitizer that contains at least 60% alcohol if soap and water are not available.

All products are produced in Betco's FDA-registered facility.

The EPA has announced the emerging pathogen policy is now in effect, which means that if a disinfectant has a kill claim against a similar virus, it is suitable for disinfection against the emerging pathogen.

### FIGHT BAC™ RTU

#### EPA registered disinfectant

- Kills common germs in 3 minutes or less \*
- Quat-based formula for use on a variety of hard, nonporous environmental surfaces
