

SANITIZE SOFT (POROUS) SURFACES

STEP 1

For soft (porous) surfaces such as carpeted floor, rugs, and drapes, remove visible contamination if present and clean with appropriate cleaners indicated for use on these surfaces.

STEP 2

To sanitize soft surfaces mix Betco® TriForce Disinfectant at a dilution rate of ½ oz. per gallon of water.

STEP 3

Apply use-solution with a sprayer. Hold bottle 6" – 8" from surface (or reference the applicator guide for specific directions) and spray until fabric is wet. Fabric must remain wet for 5 minutes. Allow fabric to Air dry. Soiled areas must be cleaned prior to sanitizing.

NOTE: If the items can be laundered, launder items in accordance with the manufacturer's instructions using the warmest appropriate water setting for the items and then dry items completely. In order to minimize the possibility of dispersing virus through the air, do not shake dirty laundry. Clean and disinfect hampers or other carts for transporting laundry according to guidance above for hard or soft surfaces.
