Sealant Infused (SI) Cleaning Pads, used in conjunction with DensiClean™, continuously deliver densifier and sealant deep into porous concrete—enhancing protection and durability with every clean	Maximize gloss and maintain a reflective finish by integrating the Shine Tool into your routine approximately 15% of the time. Suggested Application: Weekly Boost: Use the Shine Tool one day per week. Quarterly Refresh: Run the Shine Tool continuously for two weeks each quarter.	Protect polished concrete surfaces by filling in the pores, reducing the risk of stains and etching.	Set Stain Defense and enhance gloss after the DEFEND step. In addition, burnishing can be performed periodically to enhance the gloss.	Transform rough, uneven concrete or cementitious terrazzo floors into a smooth, consistent surface with ease. Follow the sequence: Step 1 Grind (Blue) Step 2 Hone (Green)	Increase surface hardness, reduce dusting, improve stain and abrasion resistance.	Refines and protects the surface, creating a mirror-smooth polish. Follow the sequence: Step 3 Polish (Tan) > Shine (Red).	Protect polished concrete surfaces by filling in the pores, reducing the risk of stains and etching.	Set Stain Defense and enhance gloss after the DEFEND step. In addition, burnishing can be performed periodically to enhance the gloss.
